MODEL 4024

Belt or Chain Drive
Garage Door Opener

 Battery Backup Capable

Highlights

- **Quiet, strong performance** – 140 volt DC motor provides quiet yet strong performance with an opening speed of 9.0" per second*. When belt drive is chosen for the rail, you have one of the most quiet openers on the market.
- **Soft Start & Stop Control** – DC technology allows your door to begin and end its movement smoothly instead of abruptly whenever you operate it, creating less noise and less wear on the door.
- **Convenience** – Features like speed, motion detector lighting system, and multi-function wall control combine to make your life a little bit easier with homeowner friendly benefits. (See back for details.)
- **Dependability** – A Limited Lifetime warranty^o on the motor and integrated gearbox shows how confident Genie is that your opener will perform when you need it to for years to come.
- **Power on Demand** – Refers to the ability of the opener to continually monitor the door's travel and deliver just the right amount of power for smooth and consistent movement.
- **GenieSense™ Monitoring** – Automatic force profiling & diagnostic technology improves safety by stopping operation when significant changes occur
- ** GENIE-NET™** – Intelligent internal platform allows the opener to expand its capability with great optional accessories.

THE GENIE STORY: Genie has a rich history in developing garage door openers that feature reliability, strength, safety, security, and convenience. Since 1954, Genie has produced millions of openers that serve millions of satisfied homeowners every day of every year.

Shouldn't you have one in your garage? Genie — The Brand You Trust.

* +/- 0.5 inches per second. Speed will slow with one-piece doors.
^o Limited non-transferable warranty. See Operation & Maintenance manual for details.

Features & Benefits

POWER & CONTROL

DC Motor Smart Technology – The 140 volt DC motor offers quiet yet strong performance. The DC motor gives the ability to integrate Soft Start & Stop control, meaning the door begins and ends its travel smoothly instead of abruptly. This also helps create less noise and less wear and tear on your door.

C-Channel Rail – Strong rail design helps promote durability and safety. Also conceals the belt (or chain) for better appearance.

Speed – The powerhead has an opening speed of 9.0 inches/second* to get you on your way faster.

SAFETY

Safe-T-Beam® Non-Contact Reversing System – When objects pass through the infrared beam, the garage door automatically stops closing and reverses open without having to make physical contact with the door.

SECURITY

Intellicode® Access Security System – Genie’s superior encryption technology prevents piracy of the radio signal that operates your door by always selecting a new code from billions of combinations each time the opener is operated.

Sure-Lock™ Control – Allows you to lock out remote controls and wireless keypad at any time for increased security – also known as a vacation lock.

CONVENIENCE

Motion Detector Lighting – Turns lights on automatically when you enter the garage for superior convenience and security. Lights stay on for 4 minutes once you exit garage or no motion is detected.

Smart Illumination – Light bulbs are positioned toward inside of garage instead of toward door for light where it’s needed most. Light stays on for 4 minutes once opener is activated for ample time to get into house. Opener features bright lighting with (2) bulb capability. Genie branded LED light bulbs recommended. (If incandescent bulbs used, 100 watt max). See Genie LED bulb this page for additional details.

Auto Seek Dual Frequency – The internal system automatically uses either the 315 or 390 MHz frequency produced by the remote control to help ensure the opener responds regardless of potential nearby frequency interference, such as military base equipment.

Pre-Programmed Remote – Ready to use out-of-the-box with simple steps to change the programming if so desired.

HomeLink® & Car2U® Compatible – Works with current and ALL previous versions of HomeLink® or Car2U®. No additional external repeater kit or compatibility bridge needed.

6’ Power Cord (Model 4024H) – For high ceiling applications.

Convenience Options

Genie® Garage Door Opener LED Bulb

Common LED and CFL bulbs can emit interference to limit the range of garage door remotes. Incandescent light bulbs, which are being phased out due to energy inefficiency, can have their lives shortened by vibration associated with opener operation. The Genie LED bulb solves these and other problems to ensure the garage door opener light doesn’t leave your garage in the dark!

Aladdin Connect®

Remotely monitor and control your garage door from almost anywhere with your smart device. Time-based features allow you to set door to automatically close and/or notify after a set length of time; as well as schedule a specific hour and minute to close the door and/or notify when it does. Also allows for multiple individual user accounts so you can provide virtual key access for your garage door to a friend, relative, or service person for a certain time, a range of time, or permanently.

Use the Aladdin Connect app to control any combination of 20 different Genie Wi-Fi integrated garage door openers or standalone Aladdin Connect Door Control Modules.

Wireless Keypad

Mounts outside your door to give you keypad code access to your garage. Back-lit keypad lets you easily see the numbers. Controls up to 3 openers. Choose a color for the flip-up cover that best complements your home.

Battery Backup

Add this option and if the power goes out, Genie battery backup power goes on so you don’t have to manually open and close the garage door!

Illuminator™ LED Remote

Perfect for homeowners on the go, this 2-button remote features a bright LED flashlight and comes with an 18” lanyard for carrying convenience. It can operate up to two Genie garage door openers with Intellicode®.

GenieMaster® Remote

This versatile remote control works with all Genie gated community receivers as well as most Genie openers ever made, including Genie 390 MHz remotes on 9-switch, 12-switch, and 9-switch trinary formats. It also is compatible with those models that have Auto Seek Dual Frequency.
