Features & Benefits

POWER & CONTROL

C-Channel Rail – Strong rail design helps promote durability and safety. Also conceals the belt (or chain) for better appearance.

Belt or Chain Drive – Choose the belt drive option for quieter operation or chain drive for economical value.

SAFETY

Safe-T-Beam® Non-Contact Reversing System – When objects pass through the infrared beam, the garage door automatically stops closing and reverses open without having to make physical contact with the door.

SECURITY

Intellicode® Access Security System – Prevents thieves from using unauthorized remotes to open your door by always selecting a new code from billions of combinations each time the opener is operated.

CONVENIENCE

Battery Backup – No more unexpectedly getting locked outside the garage when the power goes out!

Auto Seek Dual Frequency – The opener automatically uses either 315 or 390 MHz frequency to avoid potential nearby interference, such as military base equipment, to help ensure the opener operates properly.

Pre-Programmed Remote – Ready to use out-of-the-box with simple steps to change the programming if so desired.

HomeLink® & Car2U® Compatible – Works with current and ALL previous versions of HomeLink® or Car2U®. No additional external repeater kit or compatibility bridge needed.

BATTERY BACKUP INCLUDED

Aladdin Connect® INTEGRATED WI-FI CONNECTIVITY

Remotely monitor and control your garage door from almost anywhere with your smart device. Time-based features allow you to set door to automatically close and/or notify after a set length of time; as well as schedule a specific hour and minute to close the door and/or notify when it does. Also allows for multiple individual user accounts so you can provide virtual key access for your garage door to a friend, relative, or service person for a certain time, a range of time, or permanently.

Use the Aladdin Connect app to control any combination of 20 different Genie Wi-Fi integrated garage door openers or standalone Aladdin Connect Door Control Modules.

Convenience Options

Genie® Garage Door Opener LED Bulb

Common LED and CFL bulbs can emit interference to limit the range of garage door remotes. Incandescent light bulbs, which are being phased out due to energy inefficiency, can have their lives shortened by vibration associated with opener operation. The Genie LED bulb solves these and other problems to ensure the garage door opener light doesn't leave your garage in the dark!

Wireless Keypad

Easy-to-program keypad mounts outside your door to give you convenient code access to your garage, which is great when you are outside without the remote control. Back-lit keypad lets you easily see the numbers and control up to 3 openers. Uses Auto-Seek Dual Frequency (315/390 MHz).

Choose a color for the flip-up cover that best complements your home. White is standard, other colors sold separately.

Illuminator™ LED Remote

Perfect for homeowners on the go, this 2-button remote features a bright LED flashlight and comes with an 18" lanyard for carrying convenience. It can operate up to two Genie garage door openers with Intellicode®.

Wireless Wall Console

An attractive wall console that's completely wireless for flexible placement in the garage. Enjoy the optional pulsing back-light as well as delay button that gives ample time (up to 30 seconds) to exit the garage before the door begins moving. The work light button can turn just the opener's light on at any time. Compatible with most Genie Intellicode® openers made since 2013.

CALIFORNIA RESIDENTS – This opener does come with a battery backup as required by California SB-969. If needed, please visit www.geniecompany.com for additional information or ask your Genie dealer for details.

¹ Limited non-transferable warranty. See Programming, Operation & Maintenance Manual for details.
